

$T_p = 1300^\circ\text{C}$

20% G2 pyroxenite + 80% peridotite

Melt compositions at  $P_{\text{final}} = 5$  kbar, no aging

### Equilibrium melting

#### Peridotite

### Pure disequilibrium melting

#### Peridotite

$Da = 0.1$

#### Peridotite

#### G2 Pyroxenite
